

Program Description

Program Name: Steve Bigalow Candlestick Patterns

Methodology: Candlestick recognition

Markets Traded: Crude oil, EuroCurrency, soybean and T-bond futures

Account Type: Proprietary

Trading futures and forex involves significant risk of loss and is not suitable for everyone.

Monthly Performance

Year	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	Year
2014												-2.89	-2.89
2015	24.72	-25.65	-22.53	19.48	-5.56								-18.94

Past performance is not necessarily indicative of future results.

Performance Calculation

Performance shown on this report is based on end-of-month cumulative account balance. In order to realize the same percentage gains/losses and drawdowns as the lead account going forward, you must fund your account with an amount equivalent to the lead account's balance at the time of entry into the program (Matching Funds). We recommend that you open your account with Matching Funds. The Matching Funds amount through May 2015 is listed below under General Information. An up-to-the-minute Matching Funds total is available on the WCA Net profit Calculator. Net profit calculated reflects advisor's initial investment of \$25,000, WCA subscription rate of \$250.00 per-month per-unit and standardized commission rate of \$39.98 per round-turn (includes Exchange and transaction fees but not NFA fees) available through any authorized AutoTrade broker. The commission rate has changed during the life of this program. The rate displayed is the current rate. Performance data is calculated using rates that applied during specific periods of time.

Notional Funding

Trade quantities and frequency in the Steve Bigalow Candlestick Patterns account do not fluctuate with changes in account equity, and Matching Funds may not be needed to meet and maintain margin requirements. If you fund with less than Matching Funds, your investment is considered "notional" and your account's performance, good or bad, will be accentuated on a percentage basis. Conversely, if you fund with more than Matching Funds, you will be de-leveraging your investment, and your gains/loss and drawdowns will be less than those experienced in the lead account on a percentage basis. The Letter of Direction you are required to sign before participating in any WCA program contains a chart that illustrates how notional funding can dramatically affect your investment. Please refer to this chart before notionally funding an account.

Trading futures and forex involves significant risk of loss and is not suitable for everyone. Past performance is not necessarily indicative of future results. Performance shown is for a proprietary account owned by Steve Bigalow and is not necessarily indicative of subscriber rate of return and drawdown due to execution, slippage, funding level and other factors. Performance includes open trade equity through market close, 5/31/2015. Net-profit calculated using initial investment of \$25,000, WCA subscription rate of \$250.00 per unit per month and standardized commission rate of \$39.98 per round-turn (includes Exchange fees but not NFA fees) available through any authorized AutoTrade™ broker. A unit is equivalent to the quantity traded by the advisor on each trade, and may vary from program to program. There have been no cash additions to this lead account. Drawdown is the greatest cumulative peak-to-valley percentage decline in month-end net equity during the life of the account. Subscribers funding with a balance equivalent to the advisor's initial investment subsequent to the program inception date could experience a drawdown that exceeds the advisor's historic drawdown on a percentage basis. Subscribers should take this into consideration when determining the funding level of their account.
